PAPER NUMBER

3732

DATE MAILED: 06/06/2003

Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Brad A. Schepers on June 5 2003.

The application has been amended as follows:

In claim 2, line 2, "extending" has been changed to -- extendable --.

In claim 9, line 1, "extends" has been changed to -- is extendable --.

In claim 31, line 2, "positioned" has been changed to -- positionable --.

In claim 37, line 5, "extending" has been changed to -- is extendable --.

EXAMINER'S REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The claims in the instant application have not been rejected using prior art because no references, or reasonable combination thereof, could be found which disclose, or suggest, an intervertebral prosthetic joint comprising a first component adapter to engage a first vertebra and including a first articular surface, and a second component adapted to engage a second vertebra and including a second articular surface, the first and second articular surfaces cooperate to permit articulating motion between the first and second components, and *at least one of the first and second articular surfaces includes at least one surface depression configured to facilitate*

Art Unit: 3732

removal of matter disposed between abutting portions of the first and second articular surfaces as set forth in claim 1.

Also, no references, or reasonable combination thereof, could be found which disclose, or suggest, an intervertebral prosthetic joint comprising a first articular component adapted to engage a first vertebra and including a projection, and a second articular component adapted to engage a second vertebra and including a recess, and at least a portion of the projection is disposed within the recess to permit articulating motion between the first and second components, and *wherein at least one of the projection and the recess defines at least one cavity configured to facilitate removal of matter disposed between the projection and the recess as set forth in claim 25.*

No references, or reasonable combination thereof, could be found which disclose, or suggest, an intervertebral prosthetic joint comprising a first articular component having a bearing surface adapted to engage a first vertebra, and a second articular component having a bearing surface adapted to engage a second vertebra, and *wherein each of the first and second articular components includes a flange extending from the bearing surface and configured to penetrate a corresponding one of the first and second vertebrae and the flange defining at least one opening therethrough to permit bone growth through the flange as set forth in claim 30.*

No references, or reasonable combination thereof, could be found which disclose or suggest, an intervertebral prosthetic joint comprising a first articular component including *means for engaging a first vertebra*, and a second articular component including *means for engaging a second vertebra*, and wherein the first and second components include surface *means for permitting articulating motion therebetween*, said surface means including *means for removing*

Art Unit: 3732

matter disposed between abutting portions of the first and second articular components as set forth in claim 40. Furthermore, the "means plus function" recitations evoke 35 USC 112, sixth paragraph, and the examiner has treated them as such since they comply with the three prong analysis (see MPEP 2181).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
